

UltiSat Government Services : Broadband Delivery of Mission-Critical Communications

Focus on your mission, not the challenges of remote communications

Global Service.
Nowhere is too remote or hostile for VIPnet solutions

One-Stop Shop.
UltiSat provisions everything from design to deployment to ongoing operations and maintenance

FROM A SINGLE SITE IN A REMOTE WAR ZONE TO HUNDREDS OF SITES SPREAD ACROSS EVERY CONTINENT, ULTISAT'S SUPERIOR INFRASTRUCTURE PROVIDES SECURE AND RELIABLE END-TO-END NETWORK SERVICES FOR GLOBAL COMMUNICATIONS.

→ Last-Mile Solutions for Remote Communications

UltiSat Delivers:

- » Custom end-to-end managed networks via VIPnet
- » Global service provider
- » VoIP, video, data, and IP services
- » Main and redundant 24/7 secure NOCs (SNOC)
- » Worldwide coverage
- » Teleport services
- » Rapid-response services
- » Host-nation approvals and landing rights
- » Proactive network monitoring
- » In-country field service with cleared personnel
- » Customer-first philosophy

Contract Vehicles

DISA and GSA have partnered to make it easier and more affordable for DOD and civilian government entities to purchase secure satellite communications services and solutions. Using an indefinite delivery, indefinite quantity (IDIQ) contract and special item numbers (SINs), government agencies buy complete end-to-end networks that provide efficient and cost-effective global networking from one vendor under a single task order.

FCSA Satellite Communications (SATCOM) Solutions — Small Business (CS2-SB)

- » Customized, end-to-end solutions
- » Professional satellite engineering services

IT Schedule 70 Contract

Also accessible by state and local governments
SIN 132-54: Transponder Services
SIN 132-55: Subscription Services

Access Anywhere. Superior Service.

Whatever the size, location, or requirements of your network, UltiSat provides customized lifecycle design, engineering, and professional services to ensure reliable, secure, and global networking. With operations on every continent, global field-support, 24/7 SNOC support, and ongoing operations and maintenance, UltiSat is your one-stop shop for all SATCOM needs.

Morale, Welfare, and Recreation Networks

From main bases to forward operating posts, U.S. military and support personnel take advantage of broadband connectivity via UltiSat's end-to-end managed VSAT service, VIPnet. Hundreds of Mbps of bandwidth supports global morale, welfare, and recreation (MWR) services and UltiSat field-service representatives provide in-theater support for hands-on training, setup, troubleshooting, and ongoing operations and maintenance.

Teleport Services

A major supplier of broadband satellite services worldwide, UltiSat offers comprehensive teleport services to more than 130 countries through its facility in Denmark. Solutions offered range from point-to-point links to fully managed network services across the globe. The teleport supports terrestrial and marine applications, extensive global roaming capabilities for mobile terminals, and secure applications for military and government uses.

Logistics and Stability Operations

Whether supporting combat and stability operations in areas with insufficient or nonexistent infrastructure or providing support for reconstruction of critical infrastructure and rebuilding social institutions, UltiSat can provide the instant infrastructure necessary to ensure networking needs are met. Offering voice, video, data, public Internet, and IP services, UltiSat provides efficient, cost-effective, and customer-specific networks.

Global Monitoring and SCADA Networks

UltiSat operates large global and complex networks for both government and nongovernment use, including two of the largest and most geographically dispersed end-to-end managed networks in operation. Whether it's supervisory control and data acquisition (SCADA), asset tracking, or systems control, many types of monitoring applications can be efficiently transported via UltiSat's infrastructure to ensure that up-to-the-minute information is always available in areas of national security.
